## Professional Synopsis

- 5+ years of experience in the field of Front End web development. Proficient in UI design and development using Angular, HTML, CSS, Bootstrap and JavaScript.
- Hands on Experience in responsive UI development.
- Experience in website development.
- Experience in developing Web applications with different libraries/frameworks like Ngx Bootstrap, CoreUI, primeNg, AngularMaterial, AG-grid-angular etc.
- Experience in debugging the web and mobile app using browser control tools.
- Exposure of backend development using .Net Core, and database MySql.
- Experience in Creating wireframes using balsamiq.
- Experience in Git & Git Extension.
- Open to explore and learn new technologies.
- Experience in Education, Queue Management, Healthcare domain.
- Ability to multitask and manage multiple priorities and commitments concurrently along with excellent troubleshooting and debugging skills.

## Technical Skills

- |                          |  |
|--------------------------|--|
| • Programming Language   | : HTML5, JavaScript, CSS3, Angular, Typescript                       |
| • Reactive programming   | : RxJs library   |
| • Database               | : MySQL & PostgreSQL   |
| • UI libraries           | : Bootstrap version 4 & 5, Tailwind                                  |
| • Angular library        | : Core UI, Angular material, Ag grid angular, Ngx Bootstrap, PrimeNg |
| • Client-Side Technology | : JavaScript, Ajax, JSON   |
| • UX Tools               | : Figma, Adobe photoshop,  |
| • Version Control Tools  | : GitHub, Git Extension, Microsoft azure                             |
| • Angular versions       | : 13, 14,15,18   |
| • IDE                    | : Visual Studio Code, Microsoft azure                                |

## Organizational Experience

- Working as **UI Engineer(Frontend)** for **Benchmark IT Solutions**, from July 2024 to till.
- Worked as **Frontend Developer** for **Sidhyati Technology solutions Pvt Ltd**, from February 2023 to May 2024.
- Worked as **UI Developer** for **Globeminds Technologies Pvt Ltd**, from Jun 2020 to February 2023.

## Projects Handled at Benchmark IT Solutions

**Project Name** : ResortCleaning – Housekeeping & Property Management

**Technologies** : Angular, Ng-Material, RxJs, AG-grid, primeNG, PHP.

**Project management** : Microsoft azure, scrum.

### Project Summary:

ResortCleaning is a platform for hospitality businesses to manage housekeeping, inspections, and property maintenance. Integrated with Property Management Systems (PMS) to automate scheduling, track real-time unit status, and generate detailed reports for invoices, payroll, and productivity. Included a service provider network to connect businesses with top maintenance and housekeeping vendors.

- Developed and maintained responsive UI components using Angular and TypeScript.
- Integrated REST APIs for data synchronization, scheduling, reporting, and service provider features.
- Built reusable, modular UI components to improve development speed and maintainability.
- Develop and maintain the angular components, services (dependency injections), modules and directives.
- Handled Ng material autocomplete components such as form-controls, date pickers, time pickers, modal, filters, dropdowns, etc.
- Worked closely with backend developers and QA to deliver features and resolve issues.
- Ensured pixel-perfect design implementation based on Figma/UI mockups.
- Wrote clean, maintainable code following Angular best practices and project coding standards.

**Project Name** : Corporate Website Development

**Technologies** : HTML5, SCSS, REST APIs, Bootstrap, PHP.

### Project Summary:

Designed and developed a responsive, SEO-optimized corporate website to enhance brand visibility and client engagement. Implemented modern UI/UX principles, mobile-first design, and API integrations for dynamic content, ensuring fast performance and cross-browser compatibility.

- Designed and developed a fully responsive corporate website with optimized performance and mobile-first design.
- Integrated APIs for dynamic content and implemented SEO-friendly structure to improve online presence.

## Project Handled at Sidhyati Technology Solutions Pvt Ltd

**Client Name** : ICA(Singapore)

**Project Name** : Customer Experience Management System

**Technologies** : Angular (version-15), NgxBootstrap, RxJs, .Net core 5.

**Database** : MySQL

**Build Tool** : Web

**Project management** : Microsoft azure, scrum

### Project Summary:

This is a web based application to provide a queue management for an administrator user to provide services to customers in optimistic time. The application also provides ways to configure services. Application has different modules which works in sync. Such as Kiosk to get queue tickets, Counter who call the queue and provide services, TV displays to shows queue calls.

- Implement the multiple modules for different section and cross browser compatible responsive UI components.
- Implement the responsive layouts with API integration.
- Handled state management using NgRx store.
- Develop and maintain the angular components, services (dependency injections), modules and directives
- Handled Ngx Bootstrap autocomplete components such as Carousel, date pickers, time pickers, modal, filters, dropdowns, etc
- Implemented multiple form groups with CRUD operations
- Actively handled handshakes with backend teams from requirements gathering to bug fixing.

## Project Handled at Globeminds Technologies Pvt Ltd

**Project Name** : Institute Management System  
**Technologies** : Angular (13), HTML,CSS,Typescript

### Project Summary:

Institute Management System (IMS) offers the smooth process for student enrollment to different administration tasks. It provides various modules to create and manage quizzes, exams and assessments. The educators can closely monitor student progress, track course, completion rates and generate reports on students' performance. Its and one stop solution for management, teachers and students

- Maintain the different modules for new features, update the components as per the new requirement.
- Identify and fixing the issues or bugs and ensure the proper error handling. Used browser control tools for debugging and troubleshoot problems
- Ensuring the user interface adapts different screen sizes and responsive design principles using media queries, CSS frameworks like bootstrap
- Implementation of reactive programming using RxJs.
- Optimize UI performance through techniques such as minimizing file sizes, reducing HTTP requests, and implementing lazy loading for faster load times.
- Testing the UI for bugs, compatibility issues, and responsiveness. Debugging code and resolving issues is part of the role.

## Education

Bachelor of Science | Shivaji University | Kolhapur | Maharashtra | 2017

HSC | Maharashtra Board| Karad | Maharashtra | 2014

SSC | Maharashtra Board| Bhikawadi | Maharashtra | 2012

## Personal Details

**Father Name** : Pratap Mahadik  
**Nationality** : Indian  
**Language Known** : English, Hindi, Marathi.  
**Present Address** : A-104, Poorva Residency, Shivsai Lane, Pimple Saudagar 411027, Pune

## Declaration

I hereby declare that all the information given above is true and correct to the best of my knowledge and belief.
